CYBERINSIGHTS | DEFENSIVE FIELD CHECKLIST

MONAI Label response evidence

Reviewed November 24, 2026 | Harpreet Singh, CISSP, CCSP

1. Inventory MONAI Label servers, containers and dormant templates.

2. Confirm the running environment and supported security release.

3. Restrict untrusted access; review service account privileges.

4. Preserve appropriate logs and integrity evidence.

5. Apply supported remediation and test approved workflows.

6. Investigate unexpected files, processes and network activity.

7. Record visibility gaps and escalate unresolved host-trust concerns.

8. Assign exceptions, rollback states and a next review.

Owner: _____ Review date: _____

Editorial checklist; no customer system or detection rule was tested. Preserve evidence under your incident process. This is not a compliance certification.
